Cloud Acceleration (CloudAx) Day is an interactive workshop that invites participants to work through a modernization use case in a team environment, simulating a real-world scenario. Unlike traditional workshops, CloudAx Day leverages exploratory and experience based learning, encouraging participants to creatively problem-solve technical and organizational challenges with insight from migration & modernization experts.

Migrate with Intention. Modernize with Impact

9:30 AM-10:00 AM

As organizations evaluate their virtualization and cloud strategies, many are rethinking how they manage legacy workloads in light of rising costs, limited scalability, and shifts in the technology landscape. This session will explore how enterprises can transition traditional virtualized environments to modern cloud infrastructure, while minimizing disruption and maintaining performance.

With the right migration approach, IT teams can align workload placement with business needs, reduce operational complexity, and unlock greater scalability and resilience. Attendees will gain insights into various migration pathways, cost-optimization strategies, and modernization techniques that support long-term flexibility and innovation across the enterprise.

Migration Use Case Overview & Team Working Session

10:00 AM-12:00 PM

Simulating a realistic team environment and fostering collaboration, participants will work as a team to navigate a modernization use case. Participants can expect prescriptive and non-prescriptive guidance from migration & modernization experts to stimulate discussion, creative thinking, and technical problem solving.
