11:00 AM-12:15 PM

Central Standard Time (CST)

Cybersecurity's role in enterprise business activities is growing exponentially. As executive leaders and board members from all industries realize the importance of cybersecurity, board directors turn to their CEOs, CFOs, CIOs and CISOs to understand their organization's ability to successfully manage cyber risk. This shift has placed new challenges and expectations on the CISO. As many executive leaders do not speak the language of cyber, most CISOs struggle to provide this essential information in a way that resonates with their boards, which makes communication a critical challenge for every CISO.
