CLOUD SOVEREIGNTY AND GENAI READINESS IN REGULATED INDUSTRIES

February 04, 2026
6:00 PM-9:30 PM
Central European Time

This roundtable will gather leaders from regulated sectors such as financial services, insurance, and energy to discuss how organizations can adopt cloud technologies while maintaining control over sensitive data and meeting strict regulatory requirements. The discussion will also explore what it means to be genuinely "AI-ready," including considerations around data quality, governance, ownership, and secure access as advanced AI capabilities continue to evolve.
Participants will engage in an open, peer-driven dialogue to exchange perspectives, share practical experiences, and identify the steps needed to prepare their organizations for a sovereign-cloud and GenAI future.
