AGENDA

Virtual Council

Move from Proactive Defense to Preemptive Resilience

SPEAKERS

F. C.
Co-Founder
Cygenta Security

Jeremy Swenson
AVP, Operational Risk | IT Oversight
Synchrony

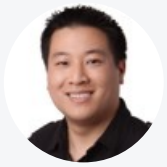
Peter Lee
CEO
SimSpace

Greg Bell
Co-Founder & Chief Strategy Officer
Corelight

marc brown
VP, Sales & Product
Scythe

Josh Devon
Co-Founder & CEO
Sondera

Eric Clopper
Director, Cyber Operations and Effects
MITRE



Jeff Tang
COO & Head of Engineering
Blue Ivy Partners

Patrick Duffy
Director of Product
Dropzone AI

Mateus Prado
Head of Digital Fraud
HSBC

Milind Buddhikot
CTO, North America Markets (NAM), Enterprise Campus Edge (ECE) Solutions
Nokia

Joseph Zhou
Americas CISO
Shein

Sihem Chaib
Global Director of Compliance
Xylem

Move from Proactive Defense to Preemptive Resilience

As cyberattacks approach near-zero breakout times, the threat landscape is rapidly shifting toward a reality where zero-days become everyday occurrences. Yet C-level execs and Security Operations Center (SOC) leaders are unprepared; few rigorously test AI before deploying agents to production, and most still lack confidence in deploying AI into production environments.

Designed for executive audiences, particularly SOC and security leaders, this 90 minute virtual event will highlight how collaborative testing and training approaches can accelerate AI adoption while ensuring operational confidence.

Keynote speaker, FC (Freakyclown), a world-renowned ethical hacker and former Head of Offensive Cyber Research at Raytheon, will show C-suite and SOC leaders how to act decisively in today's AI-driven threat landscape.

Attendees will learn how organizations can build trust in AI through realistic testing, see how adversarial simulations help SOC teams uncover gaps and strengthen resilience, and hear practical strategies from cyber experts for navigating today's asymmetric battlefield.

Eastern Time

Welcome & Opening Remarks

11:00 AM-11:10 AM

SPEAKER

Peter Lee
CEO
SimSpace

The Nation State of Cyber Security

11:10 AM-11:30 AM

FC, aka Freakyclown, is a world-renowned ethical hacker, social engineer, and bestselling author of *How I Rob Banks*. With over 30 years experience, he has helped banks, governments, and global organizations uncover vulnerabilities by thinking like an adversary. A former Head of Offensive Cyber Research at Raytheon and now co-founder of cybersecurity firm Cygenta, FC brings deep insight into how nation-states and sophisticated attackers operate, and how to defend against them.
Freakyclown will present an expert and technology-agnostic view of the market in this age of AI to paint a clear picture of how C-suite executives and SOC leaders can take immediate action.

Building Trust in AI Prior to Deployment

11:30 AM-12:15 PM

This panel of cybersecurity experts will explore how executives and SOC leaders can trust the AI they deploy into production, specifically, through rigorous testing using real-world attacks and tight alignment between human operators and agentic systems. Panelists will address the risks inherent in depending exclusively on humans in the loop to oversee and manage untested AI agents, the challenges of measuring performance under pressure, and practical steps to ensure resilience prior to deployment to production. Attendees will gain insight into balancing speed with trust and strengthening decision-making in an increasingly autonomous, high-velocity, threat landscape.
