### RETAIL IN THE AGE OF AGENTIC

**March 10, 2026**

5:30 PM-9:00 PM

Eastern Time

Today's CISOs must deliver more than detection; they must ensure the business continues to operate during and after a cyber incident. At this curated executive experience, join senior InfoSec leaders for an in-depth discussion on how visibility into east-west traffic, rapid containment, and integrated response strategies are reshaping modern cyber resilience. Attendees can expect an open, off-the-record exchange on what's working, what isn't, and how leading organizations are evolving their security operating models to meet today's threat landscape.

TOGETHER WITH
