GENERATIVE AI IN CYBERSECURITY: A STRATEGIC DISCUSSION

May 20, 2025

5:30 PM-9:00 PM

Pacific Time

Generative AI is transforming cybersecurity by enhancing threat detection, risk assessment, and incident response, empowering resource-constrained teams to address evolving threats. However, its potential also brings challenges that require thoughtful implementation and strategic oversight. Join cybersecurity leaders for a roundtable discussion on the profound impact of Generative AI in SecOps. Explore how AI is reshaping digital defense, enhancing threat intelligence, and identifying both opportunities and risks. Gain practical insights on establishing best practices for responsible AI adoption, with a focus on real-world use cases, adversarial AI defense, data privacy, and the balance between automation and human expertise.
