THE CURRENT THREAT LANDSCAPE & STAYING A STEP AHEAD OF FUTURE CYBER TRENDS

April 13, 2023

5:30 PM-9:00 PM

Eastern Time

Join Palo Alto Networks® Unit 42™ on April 13 for an exclusive evening of fine dining and to get industry-leading intelligence directly from the experts. Discover how your organization can leverage innovative cyber risk management and incident response strategies to strengthen your security and safeguard your organization.

Network with your executive industry peers while enjoying cocktails and appetizers, followed by a sit-down dinner and an interactive group discussion with our Unit 42 experts. Our cybersecurity leadership will share their experience in helping organizations around the world protect users and data against today's advanced threats, with best practices and tools you can implement today. This is a golden opportunity for you to ask your tough questions while socializing and networking with your industry peers.
