## TRANSFORMING AI-NATIVE ASSURANCE FROM A COMPLIANCE BURDEN TO A CATALYST FOR GROWTH

For today's security executive, manual GRC and lengthy security reviews are not just operational drains—they are a quantifiable bottleneck to enterprise growth, customer trust, and a drain on board-level confidence. As the adoption of Agentic AI accelerates across the organization, it is imperative for CISOs and CIOs to move past reactive compliance and manual workflows towards AI driven, autonomous and continuous assurance.

- In this exclusive event, join us to discuss the executive strategy for implementing Al-driven assurance. We will address the core
  leadership challenges, including: Gaining real-time risk visibility and translating compliance posture into a clear business metric
  for the board.
- Structuring a security-aligned organization that seamlessly blends human judgment with AI automation to accelerate GRC workflows.

Leveraging integrated assurance platforms to eliminate repetitive security questionnaire cycles and proactively build customer trust - a powerful market differentiator. Discover how we can help you achieve operational excellence, reduce material risk, and position your security function as a revenue-accelerating system of digital trust.
