FROM AI EXPERIMENTATION TO ENTERPRISE VALUE. THE AGENTIC AI PLAYBOOK

October 28, 2026
5:30 PM-9:00 PM

Central Time

The enterprise AI paradigm is rapidly shifting from simple task automation to autonomous, intelligent process orchestration. While most organizations have tested generative AI pilots, few have successfully unlocked scalable, governed, and outcome-driven ROI. Join senior leaders from AWS and Tech Mahindra for an exclusive executive-level discussion on turning Agentic AI vision into operational reality.

In this session, C-suite leaders will explore how to identify high-value operational use cases built for true enterprise scale and accelerate adoption using AWS-native capabilities alongside proven industry accelerators. We will also address how to maintain strict control and compliance, striking the right balance between autonomous decision-making and responsible governance.

Following the discussion, join us for a relaxed networking reception featuring catered food and drinks. This is a great opportunity to connect with peers and exchange insights over great food and refreshments!
