BEYOND LIFT-AND-SHIFT: MODERNIZING BFSI AI ON AWS

August 19, 2026

6:00 PM-9:30 PM

India Standard Time

Most banks, insurers, and NBFCs already run AI in production but often on platforms that cap performance, raise cost, or slow the shift to newer models. Migrating as-is captures only part of the value. This intimate round table brings together senior BFSI leaders for a peer-level conversation on moving beyond a simple lift-and-shift: using the migration to AWS as a chance to adopt stronger models, re-architect for scale, and unlock better outcomes across risk, customer experience, and cost. Designed as an off-the-record discussion over dinner and not a set of presentations, the evening is a chance for decision-makers to compare notes with peers and rethink what their AI stack could deliver.
