CISOs know that time does not stand still and need to exhibit adaptability and resilience, especially during times of disruption. Being forced to make extremely fast decisions with high levels of uncertainty requires the latest knowledge within the industry's latest technologies. The CISO Vision Council is a virtual gathering for CISOs to connect with peers and discuss challenges and solutions that will help their organizations to stay ahead of technology innovations, regulations and an ever-changing risk landscape.

Cybersecurity's role in enterprise business activities is growing exponentially. As executive leaders and board members from all industries realize the importance of cybersecurity, board directors turn to their CEOs, CFOs, CIOs and CISOs to understand their organization's ability to successfully manage cyber risk. This shift has placed new challenges and expectations on the CISO. As many executive leaders do not speak the language of cyber, most CISOs struggle to provide this essential information in a way that resonates with their boards, which makes communication a critical challenge for every CISO.
