## The Future of IT & Cybersecurity

# CIO & CISO Think Tank

### SPEAKERS

**Dorrit Varslott  
Lilliedahl**  
Director Supply  
Chain Management  
EPOS Audio A/S

**Sabna Sainudeen**  
Global Director,  
Application Security  
Carlsberg Group

**Sebastian Mabilion**  
CISO  
Bunker Holding

**Lars Brunsgård**  
CISO & Sr. Director, IT  
Infrastructure &  
Operations  
Topsoe

**James Adamczuk**  
Global CX Strategy  
Lead  
Zoom

**Arvind Chigateri**  
Chefkonsulent - Data  
& AI Governance  
HOFOR

**Frederik Braun**  
Cyber Assurance  
Manager  
INGKA GROUP IKEA

**Torben Nørgaard**  
CTO & Analytics  
Mærsk Mc-Kinney  
Møller Center for  
Zero Carbon  
Shipping

**Sara Mehrabi**  
VP Data & Analytics  
CDO  
COWI

**Zoja Antucevič**  
CEO and Founder  
SolutionLab

**Neeraj Avasthi**  
Senior IT Director/  
Head of Generation  
Digital & Technology  
Delivery  
Ørsted

**Nicolas Gomez**  
Iglesias  
VP, CISO & Head of  
Information Security  
Volvo Group

**Søren Kriegbaum**  
CTO & Owner  
Computopic

**Sheraz Javed**  
CTO  
Custimoo

**Sebastian Sbirna**  
Head of Data  
Governance  
Novo Nordisk

**Maria Christiansen**  
Head of Applied AI,  
Finance  
TDC NET

**Isabel Quintero**  
Deputy CPO/CTO  
inpay

**Lena Jensen**  
Associate Director,  
Digital, Data & IT  
Novo Nordisk

**Jovana Marić**  
Head of Onboarding,  
Support and IT  
Operations  
inpay

**Rune Abrahamsson**  
Chief Developer,  
Technology  
Enablement  
Nykredit

**Casper Krogh**  
Enterprise Sales  
Engineer  
Abnormal AI

# Machines that Hum | AI Companion and the Human Harmony

10:10 AM-10:45 AM

In a world of noise, Machines That Hum invites leaders to listen differently. James Adamczuk explores how Zoom's AI Companion turns information into harmony - intelligence that flows through work like water, shaped by human hands. Through sound, storytelling, and trust, he reveals how the future of AI isn't automation but partnership - where deterministic structure meets human intuition, and technology finally learns to hum in tune with us.

10:50 AM-11:35 AM

# Mental Fatigue, Burnout & the Human Risk Factor in Technology and Cybersecurity

Technology and Cybersecurity isn't just a technical challenge it's a human one. With mounting pressure, 24/7 threats, and increasing accountability, today's workforce is under immense stress. This leadership roundtable explores the intersection of mental wellness, organizational resilience, and insider risk. Topics include burnout detection, human error trends, building psychologically safe teams, and fostering a culture where security isn't just enforced but owned. Learn how executives are rethinking workforce sustainability in security, with practical strategies for retention, performance, and mental clarity at every level

## CHAIR

**Rune Abrahamsson**  
Chief Developer,

## PANEL

# Rearchitecting the Enterprise for Agentic AI: Control, Collaboration, and the Next Frontier of Automation

11:55 AM-1:00 PM

Agentic AI, autonomous systems that perceive, reason, and act with minimal human intervention is poised to redefine how work gets done. As these intelligent agents move beyond experimentation into enterprise-scale deployments, organizations must prepare to fundamentally rearchitect their digital environments.

This panel will explore how leaders can operationalize agentic AI to drive efficiency, creativity, and strategic advantage while preserving oversight, governance, and trust. Discussion topics will include designing workflows around autonomous decision-making, managing human-agent collaboration, and navigating emerging risks such as bias, security, and operational drift. Join us as we unpack what it truly means to lead in an era of intelligent, action-oriented AI and how to ensure these agents serve both your innovation goals and core business values.

## PANEL

### Securing the Rise of Agentic AI: Trust, Control, and Resilience in Autonomous Systems

As agentic AI systems evolve from experimental tools to enterprise-grade digital workers—capable of making decisions, taking actions, and adapting in real time—they introduce a new paradigm of both possibility and risk. Unlike traditional automation, agentic AI operates with greater autonomy, raising urgent questions for security leaders: How do we ensure control? How do we manage risk when systems learn, act, and adapt independently?

This panel will explore the security implications of deploying agentic AI across business operations—from data privacy and decision integrity to real-time threat mitigation and adversarial AI risks. We'll dive into the intersection of governance, identity management, and AI observability, and how CISOs can build frameworks that safeguard both the systems and the outcomes.

VP, CISO & Head of  
Information Security  
Volvo Group

**Sabna Sainudeen**  
Global Director,  
Application Security  
Carlsberg Group

## FIRESIDE CHAT

### The Human Side of Tech: Why Soft Skills Are the Real Superpower

In a world obsessed with digital transformation, AI, and automation, it's easy to forget the power of human connection. But the truth is technology doesn't lead, people do. As roles evolve and teams become more cross-functional, the ability to listen, influence, adapt, and collaborate has become just as critical as technical expertise.

Today's CIOs, CISOs, and tech leaders are expected not only to drive innovation, but to communicate across departments, manage diverse teams, and navigate uncertainty with empathy and clarity. Emotional intelligence, storytelling, active listening, and resilience are no longer "nice to have" they're essential for anyone leading in a fast-moving, high-stakes environment.

Nowhere is this leadership shift more relevant than in the Europe particularly in Copenhagen, a city built on creativity, reinvention, and cultural diversity. Here, the ability to connect across perspectives isn't just a professional skill it's a way of life. As tech and business worlds converge, Copenhagen's unique blend of innovation and human-centered thinking offers the perfect backdrop to explore how soft skills are reshaping the future of leadership.

This session dives into why the most successful executives are blending EQ with IQ to inspire trust, build alignment, and drive lasting impact.
