Head of Data & AI
Platform and Data
Analytics
Natera

Yabing Wang
CISO
Justworks

**Beatrice
Sirchis**
FVP Head
Application Security
IDB Bank

Nawaz Alli
Director,
Technology (CIO)
Wafra

**Jake
Bernardes**
CISO
Anecdotes AI Ltd

Mitesh Shah
CDO
CardWorks

**Margaret
Morton**
VP, Cybersecurity
Waterfall Asset
Management LLC

**Barbara
Kissner**
CIO
Segal

Gilad Globen
CTO
American Exchange
Group

Ran Harel
AVP of Security
Products
Semperis

Alaa Moussawi
Chief Data Scientist
- CDO
New York City Council

David Sans
CIO
D Boral Capital

Ryan Chow
SVP Security
People Inc

Stephen Alford
CIO
Worldwide
Environmental
Products

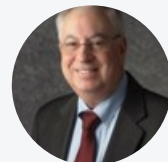

Sri Kongara
Head of Data
Governance
TradeWeb Markets

Jay Haque
Senior Director, IT &
Cybersecurity
New York Public
Library

**Randy
Cleghorne**
CIO
Goodwill Industries of
Greater NY and
Northern NJ, Inc.

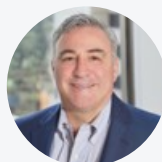

**David
Finkelstein**
CIO
RiverSpring Health

**Ashwin
Krishnan**
Founder and Host
StandOutIn90Sec

Melissa Ouari
VP and CISO
Money Management
International

Tony Parrillo
Global Head of
Security
Schneider Electric

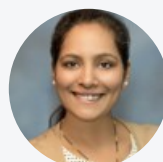

Jeff Marshall
Global Deputy CIO
& NA CIO
Havas People

**Stanislav
Rosenberg**
Global Director of
Advanced Analytics
Mars

Galo Vaca
CISO
Northfield Bank

Gurpreet Bal
CIO

Breakfast & Registration

8:30 AM-9:30 AM

Opening Remarks

9:30 AM-9:40 AM

KEYNOTE

9:40 AM-10:15 AM

Digital Inside Out: Overcoming the Mid-Tenure CIO Plateau

Many CIOs successfully stabilize systems and deliver early wins, only to find their influence plateauing just as the business expects more. Based on insights from his book "Digital Inside Out", Nicholas Colisto explores the critical mid-tenure inflection point where technology leaders must shift from managing platforms to shaping business outcomes. Attendees will leave with a practical perspective on leading digital transformation from the inside out, turning external market signals into lasting organizational impact.

SPEAKER

Colisto**

SVP & CIO
Avery Dennison

KEYNOTE PANEL

10:20 AM-11:05 AM

The Regulatory Myth: Forcing AI Velocity in High-Stakes Industries

Regulatory compliance, data sovereignty, and systemic risk are the ultimate excuses used to stall production-level AI. But while some organizations hide behind guardrails, industry trailblazers are weaponizing them to move faster.

This session unites elite technology executives across Financial Services, Healthcare, Energy, and Retail to debunk the "highly regulated" bottleneck. Discover how market leaders are aggressively forcing core modernization, protecting critical infrastructure, and scaling autonomous workflows without tripping over strict compliance parameters

PANELIST

Gurpreet Bal

CIO
BHI

FIRESIDE CHAT

11:05 AM-11:15 AM

StandOutIn90Sec Live Podcast

In an increasingly automated world, trust remains uniquely human. Join StandOutIn90Sec host Ashwin Krishnan for a live podcast on how tech leaders can use personal storytelling to build authentic recognition, foster team belonging, and drive executive trust across the enterprise.

Networking Break

11:15 AM-11:30 AM

PANEL

11:30 AM-12:15 PM

The Talent Reset: Who Builds, Secures, and Governs AI?

GenAI is reshaping how software is built, tested, and deployed, forcing organizations to rethink traditional roles across engineering and security. At the same time, talent shortages persist, and the definition of “technical expertise” is shifting.

This conversation examines how leaders are restructuring teams, redefining skill sets, and making strategic decisions about where human expertise remains critical in an AI-augmented workforce.

PANELIST

Rod Aday

CISO

Bank of China, USA

PANEL

12:20 PM-1:00 PM

Democratization vs. Shadow AI: Designing Enterprise Guardrails for Citizen Development

Generative AI assistants and desktop low-code/no-code workflows have effectively turned every business unit employee into an application developer. While this citizen-led model solves localized business bottlenecks at a rapid pace, it creates major security holes, unmanaged shadow IT, and intellectual property exposure.

This panel brings technology and security leaders together to discuss creating unified sandboxed execution environments that empower non-technical teams to innovate without compromising live corporate databases or corporate security posture.

PANELISTS

Johnny Hand

Global CISO

TrendAI

Tony Parrillo

Global Head of Security

Schneider Electric

DISRUPTOR

1:05 PM-1:20 PM

Beyond GenAI: From Productivity Gains to Business Transformation

Many organizations have seen early gains from generative AI, but the next challenge is translating those gains into meaningful business transformation.

This discussion focuses on how leaders are moving beyond isolated use cases to embed AI into core business processes, while balancing innovation with governance, risk, and long-term sustainability.

SPEAKER

Ran Harel

AVP of Security
Products
Semperis

Lunch & Networking

1:20 PM-2:20 PM

DISRUPTOR

2:20 PM-2:35 PM

Quantum Risk Is No Longer Theoretical: Preparing for the Security Reset

Quantum computing has the potential to break widely used encryption standards, yet many organizations remain unprepared for what that transition entails.

This session takes a candid look at the timeline, the real risks, and why waiting may create long-term exposure that cannot be easily reversed.

VISION VOICES

2:40 PM-3:05 PM

Generative Engine Optimization (GEO): The Tech Architecture of Digital Discoverability

Traditional Search Engine Optimization (SEO) is facing a structural demise. As business clients, enterprise buyers, and broader tech ecosystems shift away from traditional keyword query pages to interactive LLM interfaces for discovery, corporate information architecture must pivot.

This session delivers a technical blueprint on the data ingestion pipelines, structured schema tagging frameworks, and authoritative API endpoints required to ensure major foundational models successfully capture, trust, and accurately cite your enterprise platforms, documentation, and services.

FIRESIDE CHAT

3:10 PM-3:40 PM

AI-Technostress: Overcoming the Fear of Being Replaced

As AI automates routine tasks, teams face severe burnout from shifting toolsets and "techno-insecurity" - the anxiety that machine reliance is eroding human critical thinking.

This session gives IT leaders a blueprint to navigate this disruption, share strategies for tech role design, and ensure AI enhances human value rather than driving team disconnection.

Networking Break

3:40 PM-4:00 PM

KEYNOTE

4:00 PM-4:25 PM

Leading Through Turnarounds, Risk, and Corporate Friction

True enterprise resilience is forged in moments of extreme friction. From orchestrating one of the most stunning operational turnarounds in Silicon Valley history as a chief executive to governing global giants on major tech and telecom boards, our featured speaker has mastered the art of leading on their own terms.

In this high-impact session, they will bridge the gap between macro-level corporate governance and strategic execution. Technology leaders will walk away with a concrete blueprint for navigating institutional risk, breaking through organizational plateaus, and architecting the intentional leadership stack required to drive velocity in an unpredictable market.

FIRESIDE CHAT

4:30 PM-4:55 PM

Non-Human Identities (NHIs) - Governing Enterprise Data Flow in Agentic AI

Human users are no longer the primary actors moving enterprise data. As agentic AI workflows automate multi-step operations, non-human identities (NHIs), autonomous agents, and service accounts interact directly with core data repositories 24/7.

This session explores how Data and AI leaders can build scalable governance frameworks for NHIs - ensuring autonomous agents access, retrieve, and process enterprise data safely without creating operational friction or corrupting data integrity.

Closing Remarks & Raffle Giveaway

4:55 PM-5:00 PM
