Where Technology Leaders Think Big National Summit

SPEAKERS

Nicholas Colisto
SVP & CIO
Avery Dennison

Jeff Marshall
Global Deputy CIO
& NA CIO
Havas People

Milind Buddhikot
CTO, North America
Markets (NAM),
Enterprise Campus
Edge (ECE)
Solutions
Nokia

Mitesh Shah
CDO
CardWorks

Randy Cleghorne
CIO
Goodwill Industries of
Greater NY and
Northern NJ, Inc.

Rod Aday
CISO
Bank of China, USA

Robert Rijos
CIO
Konica Minolta
Healthcare Americas,
Inc.

Santosh Kumar Yamsani
Global Head of
Enterprise Core &
Platform
Engineering
BNY

Johnny Hand
Global CISO
TrendAI

Umang Nagpal
Exec Director,
Global Technology
Product Portfolio
Operations
JPMorganChase

Dhouglas Carvalho
VP Delivery Lead -
Horizontal Portfolio
Governance
Bank of America

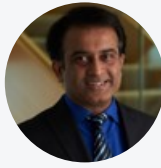

Cong Fang
Head of Liquidity
Risk Oversight
Mzuho

Donald Shkempi

CISO
DZ Bank AG

Deepak Gaikwad

Head of Data & AI Products
PNC Bank

Sunny Zhu

Head of Data & Analytics
Indeed

abdul hafeez shaik

Head of Data & AI Platform and Data Analytics
Natera

Yabing Wang

CISO
Justworks

Beatrice Sirchis

FVP Head Application Security
IDB Bank

Nawaz Alli

Director, Technology (CIO)
Wafra

Jake Bernardes

CISO
Anecdotes AI Ltd

Barbara Kissner

Chief Information Officer
Segal

Gilad Globen

CTO
American Exchange Group

Ran Harel

AVP of Security Products
Semperis

David Sans

CIO
D Boral Capital

Ryan Chow

People Inc

Stephen Alford

CIO
Worldwide Environmental Products

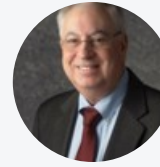

Sri Kongara

Head of Data Governance
TradeWeb Markets

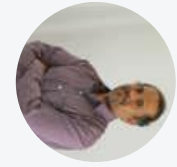

Jay Haque

Senior Director, IT & Cybersecurity
New York Public Library

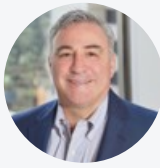

David Finkelstein

CIO
RiverSpring Health

Ashwin Krishnan

Founder and Host
StandOutIn90Sec

Tony Parrillo

Global Head of Security
Schneider Electric

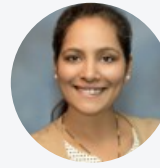

Stanislav Rosenberg

Global Director of Advanced Analytics
Mars

Galo Vaca

CISO
Northfield Bank

Gurpreet Bal

CIO
BHI

Ibrahim Jackson

Founder & CEO
Ubiquitous Preferred Services

Melissa Ouari

VP and CISO
Money Management International

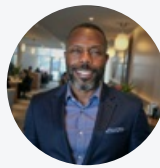

Margaret Morton

VP, Cybersecurity
Waterfall Asset Management LLC

Alaa Moussawi

Chief Data Scientist - CDO
New York City Council

Talvis Love

Group Chief, Information & Digital Officer
National Grid

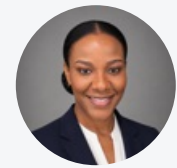

Ruth Hubbard

Director, Data Product Strategy & Partnerships
Fiserv

Bharat Amin

Retired EVP and CIO
Huntington Ingalls Industries

Chika Anjemba

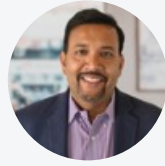

Former SVP, AI Product & Transformation Lead
Citi

Gopichand Mannava
Chief Data Architect
State of Connecticut

Julie Luengas
CNIO
Stony Brook Medicine

Sugato Bose
Chief Enterprise Architect
Medline Industries

Eastern Time

Breakfast & Registration

8:30 AM-9:30 AM

Opening Remarks

9:30 AM-9:40 AM

KEYNOTE

Digital Inside Out: Overcoming the Mid-Tenure CIO Plateau

9:40 AM-10:10 AM

Many CIOs successfully stabilize systems and deliver early wins, only to find their influence plateauing just as the business expects more. Based on insights from his book "Digital Inside Out", Nicholas Colisto explores the critical mid-tenure inflection point where technology leaders must shift from managing platforms to shaping business outcomes. Attendees will leave with a practical perspective on leading digital transformation from the inside out, turning external market signals into lasting organizational impact.

SPEAKER

Nicholas Colisto
SVP & CIO
Avery Dennison

KEYNOTE PANEL

10:15 AM-11:00 AM

The Regulatory Myth: Forcing AI Velocity in High-Stakes Industries

Regulatory compliance, data sovereignty, and systemic risk are the ultimate excuses used to stall production-level AI. But while some organizations hide behind guardrails, industry trailblazers are weaponizing them to move faster. This session unites elite technology executives across Financial Services, Healthcare, Energy, and Retail to debunk the "highly regulated" bottleneck. Discover how market leaders are aggressively forcing core modernization, protecting critical infrastructure, and scaling autonomous workflows without tripping over strict compliance parameters

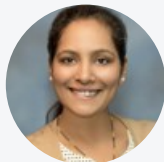

CHAIR

Ibrahim Jackson

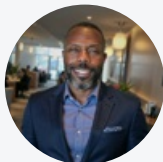

Founder & CEO
Ubiquitous Preferred Services

PANELISTS

Gurpreet Bal

CIO
BHI

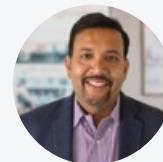

Talvis Love

Group Chief,
Information & Digital
Officer
National Grid

Gopichand Mannava

Chief Data Architect
State of Connecticut

Sugato Bose

Chief Enterprise
Architect
Medline Industries

DISRUPTOR

11:05 AM-11:20 AM

Leading Through Turnarounds, Risk, and Corporate Friction

True enterprise resilience is forged in moments of extreme friction. From orchestrating one of the most stunning operational turnarounds in Silicon Valley history as a chief executive to governing global giants on major tech and telecom boards, our featured speaker has mastered the art of leading on their own terms.

In this high-impact session, they will bridge the gap between macro-level corporate governance and strategic execution. Technology leaders will walk away with a concrete blueprint for navigating institutional risk, breaking through organizational plateaus, and architecting the intentional leadership stack required to drive velocity in an unpredictable market.

Networking Break

11:20 AM-11:35 AM

PANEL

11:35 AM-12:20 PM

The Talent Reset: Who Builds, Secures, and Governs AI?

GenAI is reshaping how software is built, tested, and deployed, forcing organizations to rethink traditional roles across engineering and security. At the same time, talent shortages persist, and the definition of “technical expertise” is shifting.

This conversation examines how leaders are restructuring teams, redefining skill sets, and making strategic decisions about where human expertise remains critical in an AI-augmented workforce.

CHAIR

Chika Anajemba

Former SVP, AI
Product &
Transformation
Lead
Citi

PANELIST

Rod Aday

CISO
Bank of China, USA

PANEL

12:25 PM-1:10 PM

Democratization vs. Shadow AI: Designing Enterprise Guardrails for Citizen Development

Generative AI assistants and desktop low-code/no-code workflows have effectively turned every business unit employee into an application developer. While this citizen-led model solves localized business bottlenecks at a rapid pace, it creates major security holes, unmanaged shadow IT, and intellectual property exposure.

This panel brings technology and security leaders together to discuss creating unified sandboxed execution environments that empower non-technical teams to innovate without compromising live corporate databases or corporate security posture.

CHAIR

Bharat Amin

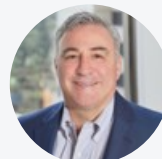

Retired EVP and
CIO
Huntington Ingalls
Industries

PANELISTS

Johnny Hand

Global CISO
TrendAI

Tony Parrillo

Global Head of
Security
Schneider Electric

DISRUPTOR

1:10 PM-1:25 PM

Beyond GenAI: From Productivity Gains to Business Transformation

Many organizations have seen early gains from generative AI, but the next challenge is translating those gains into meaningful business transformation.

This discussion focuses on how leaders are moving beyond isolated use cases to embed AI into core business processes, while balancing innovation with governance, risk, and long-term sustainability.

SPEAKER

Ran Harel

AVP of Security
Products
Semperis

Lunch & Networking

1:25 PM-2:25 PM

DISRUPTOR

2:25 PM-2:40 PM

Quantum Risk Is No Longer Theoretical: Preparing for the Security Reset

Quantum computing has the potential to break widely used encryption standards, yet many organizations remain unprepared for what that transition entails.

This session takes a candid look at the timeline, the real risks, and why waiting may create long-term exposure that cannot be easily reversed.

FIRESIDE CHAT

2:45 PM-3:20 PM

AI-Technostress: Overcoming the Fear of Being Replaced

As AI automates routine tasks, teams face severe burnout from shifting toolsets and "techno-insecurity" - the anxiety that machine reliance is eroding human critical thinking.

This session gives IT leaders a blueprint to navigate this disruption, share strategies for tech role design, and ensure AI enhances human value rather than driving team disconnection.

3:35 PM-3:55 PM

PANEL

3:55 PM-4:35 PM

Non-Human Identities (NHIs) - Governing Enterprise Data Flow in Agentic AI

Human users are no longer the primary actors moving enterprise data. As agentic AI workflows automate multi-step operations, non-human identities (NHIs), autonomous agents, and service accounts interact directly with core data repositories 24/7.

This session explores how Data and AI leaders can build scalable governance frameworks for NHIs - ensuring autonomous agents access, retrieve, and process enterprise data safely without creating operational friction or corrupting data integrity.
