FROM AI EXPERIMENTATION TO PRODUCTION: ACCELERATING OPENAI WORKLOADS TO AMAZON BEDROCK IN FINANCIAL SERVICES

September 15, 2026

5:30 PM-9:00 PM

Eastern Time

Financial services and insurance organizations have rapidly adopted generative AI, but many are now facing challenges scaling from pilot use cases to secure, governed production environments—driven by increasing complexity, cost pressures, and regulatory requirements.

This executive roundtable will bring together industry peers and AI experts to discuss practical approaches for transitioning OpenAI workloads to Amazon Bedrock.

The conversation will focus on how to establish a governed, scalable AI operating model—enabling greater control, cost visibility, and multi-model flexibility—while accelerating time to value by turning fragmented pilots into production-ready, business-impacting solutions.
