

# AGENDA

The Future of IT & Cybersecurity

# CIO & CISO Think Tank

## SPEAKERS

**Nadia Volkova**  
Global Digital &  
Technology Director  
[Diageo](#)

**John Weaver**  
Managing Director  
[Kroll](#)

**Ajay Kumar**  
Head of AI Product  
Growth  
[Salesforce](#)

**Matthew Farmer**  
CISO  
[Heathrow Airport](#)

**Sharon Peters**  
Group CDO  
[Boldyn Networks](#)

**Eric Alter**  
SVP, Cyber, AI  
Engagement &  
Growth Leader  
[Marsh](#)

**Jez Davies**  
Global Head of  
Information  
Architecture  
[Northern Trust](#)

**Enis Sahin**  
Global Head, Security  
Architecture  
[Federated Hermes](#)

**Aparna Sharma**  
Head of Analytics  
[NHS England](#)

**Neil Davidson**  
Head of Data  
Platform  
[Morningstar](#)

**Gurpreet Singh**  
Managing Director  
and VP of Integrated  
Safety  
[IQVIA](#)

**Mantas  
Marcinkevicius**  
CISO  
[Lloyd's List  
Intelligence](#)

**Joanne Elieli**  
Partner and Cyber  
Lead  
[Stephenson  
Harwood](#)

**Shruti Ahuja-  
Ramamurthy**  
Head of Digital  
Transformation,  
Business Intelligence  
& Analytics  
[Virgin Media Oz](#)

**Temi Onanuga**  
Group Head of IT  
[Aventum Group](#)

**Lee Pentecost**  
Group Head of  
Architecture &  
Strategy  
[Puregym](#)

**Nina Tatsiy**

## Registration

8:30 AM-9:15 AM

## Morning Networking

9:15 AM-10:00 AM

## Opening Remarks

10:00 AM-10:10 AM

## VISION VOICES

11:35 AM-11:55 AM

## Resilience Isn't Motivation: A System for High-Pressure Life and Work

Endurance athlete and corporate lawyer Dmytro Moyseyev presents a practical, evidence-informed framework for resilience shaped by extreme endurance challenges, including a 570km run across Ireland in 138 hours and 50 marathons in 50 consecutive days. Following a life-threatening medical crisis, he rebuilt trust in his body and developed a systematic method for operating under sustained stress and uncertainty. Moving beyond motivational “grit” narratives, this keynote translates resilience into repeatable principles for demanding professional settings: maintaining momentum under pressure, designing systems that reduce reliance on willpower, recovering strategically to prevent burnout, and sustaining performance through purpose and meaning. Attendees leave with clear tools they can apply immediately—personally and professionally.

## FIRESIDE CHAT

# Cybersecurity Resolve: Mental Fatigue, Burnout & the Human Risk Factor

2:50 PM-3:25 PM

Cybersecurity isn't just a technical challenge—it's a human one. With mounting pressure, 24/7 threats, and increasing accountability, today's workforce is under immense stress. This leadership roundtable explores the intersection of mental wellness, organizational resilience, and insider risk. Topics include burnout detection, human error trends, building psychologically safe teams, and fostering a culture where security isn't just enforced—but owned. Learn how executives are rethinking workforce sustainability in security, with practical strategies for retention, performance, and mental clarity at every level.

## Coffee Break

11:15 AM-11:35 AM

## PANEL

# The Next Wave Agentic AI: Control, Collaboration, and the Future Frontier of Automation

10:30 AM-11:15 AM

Agentic AI, autonomous systems that perceive, reason, and act with minimal human intervention is poised to redefine how work gets done. As these intelligent agents move beyond experimentation into enterprise-scale deployments, organizations must prepare to fundamentally rearchitect their digital environments.

This panel will explore how leaders can operationalize agentic AI to drive efficiency, creativity, and strategic advantage while preserving oversight, governance, and trust. Discussion topics will include designing workflows around autonomous decision-making, managing human-agent collaboration, and navigating emerging risks such as bias, security, and operational drift. Join us as we unpack what it truly means to lead in an era of intelligent, action-oriented AI and how to ensure these agents serve both your innovation goals and core business values.

### CHAIR

Aparna Sharma  
Head of Analytics  
NHS England

### PANELISTS

Neil Davidson  
Head of Data Platform  
Morningstar

Lee Pentecost  
Group Head of Architecture & Strategy  
Puregym

Nina Tatsiy  
CIO  
Quadient

## VISION VOICES

# Cybersecurity Trends in 2026 - Follow the Money!

10:10 AM-10:25 AM

Most trend forecasts rely on vibes, but in times of complexity and noise, the clearest throughline is still to "follow the money". This session will trace where tech and cybersecurity investments have recently flowed to steer the industry, and how cybercriminals have been monetizing their operations to shape the threat landscape. By comparing industry funding patterns with the financial incentives driving threat actors, we'll highlight the real forces influencing cybersecurity in 2026 and where defenders should focus next.

## PANELISTS

12:35 PM-1:35 PM

## FIRESIDE CHAT

### The Future of Cyber Resilience: Winning in a World of Constant Threats

12:00 PM-12:35 PM

In an era of escalating cyber threats, evolving attack surfaces, and accelerated digital transformation, traditional security models are no longer enough. This keynote will explore what it means to build cyber resilience in today's complex environment—where speed, adaptability, and business alignment are paramount. From securing hybrid and multi-cloud environments to integrating AI-driven threat intelligence, we'll examine how leaders can future-proof their security strategies while enabling innovation. Learn how to shift from reactive defense to proactive resilience, ensuring your organization can not only withstand but thrive amid disruption.

## PANEL

### Agentic AI and Security: Trust, Control, and Resilience in Autonomous Systems

1:40 PM-2:25 PM

As agentic AI systems evolve from experimental tools to enterprise-grade digital workers—capable of making decisions, taking actions, and adapting in real time—they introduce a new paradigm of both possibility and risk. Unlike traditional automation, agentic AI operates with greater autonomy, raising urgent questions for security leaders: How do we ensure control? How do we manage risk when systems learn, act, and adapt independently?

This panel will explore the security implications of deploying agentic AI across business operations—from data privacy and decision integrity to real-time threat mitigation and adversarial AI risks. We'll dive into the intersection of governance, identity management, and

AI observability, and how CISOs can build frameworks that safeguard both the systems and the outcomes.

## VISION VOICES

### What's AI Doing for You?

2:30 PM-2:45 PM

The terms "Artificial Intelligence" and "Advanced Machine Learning" are often thought of interchangeably. While there is a relationship between AI and AML, to say they are the same thing is an oversimplification and misclassification. Rather, one begets the other with AI being the basic principle upon which AML is developed. As AI begins to mature and migrate away from purely advanced mathematical operations into decision making paradigms, AML steps forward as the predictive ability of machines to process vast quantities of data. As data and analytics becomes foundational to the way every business operates, AI and AML will become foundational capabilities.

### The Human Advantage in 2026: Why Soft Skills Are Tech's Greatest Competitive Advantage

3:45 PM-4:25 PM

2026 is an era dominated by digital transformation, AI, and automation, it's easy to overlook the one constant that truly drives progress: people. Technology may enable change, but leadership—and impact come from human connection. As roles evolve and teams become increasingly cross-functional, skills like listening, influence, adaptability, and collaboration are now as critical as technical expertise. Today's CIOs, CISOs, and technology leaders are expected to do more than deliver innovation. They must communicate across the business, lead diverse teams, and navigate uncertainty with clarity and empathy. Emotional intelligence, storytelling, active listening, and resilience are no longer optional—they are core leadership capabilities in a fast-moving, high-stakes environment. This shift is especially evident in the UK and uniquely so in London, a place defined by creativity, reinvention, and cultural diversity. In London, the ability to connect across perspectives isn't just a professional advantage; it's a necessity. As technology and business continue to converge, the city provides a powerful backdrop for exploring how human-centered leadership is shaping the future of tech.
