June 25, 2026

Eastern Time

Building Your Data Foundation

1:35 PM-2:20 PM

In today's data-driven economy, the organizations that win are those that treat data as a strategic asset — not just an operational byproduct. This session examines how leading enterprises are designing and executing data strategies that break down silos, improve data quality, and enable real-time insights that drive business decisions. By leveraging Oracle's robust data management capabilities on AWS, attendees will discover how to build a modern data strategy that fuels innovation, accelerates growth, and creates lasting competitive advantage.

Opening Remarks

1:00 PM-1:05 PM

Cocktail Reception

4:10 PM-7:10 PM

AWS Cloud Infrastructure combined with Oracle Exadata Database Technology for the Cloud Era

1:05 PM-1:35 PM

Amazon Web Services Amazon Web Services (AWS) delivers cloud infrastructure engineered for enterprise-grade availability, security, and scalability, with a global network of regions and availability zones ensuring high uptime and resilience backed by industry-leading compliance certifications and security controls that enable organizations to scale for peak demand while protecting sensitive data. Organizations running Oracle databases traditionally face a choice between modernizing in place or moving to the cloud, but Oracle AI Database@AWS eliminates that trade-off by allowing Oracle workloads to run natively on AWS Exadata infrastructure with minimal changes. This solution

unifies data across both ecosystems to power AI and analytics with Amazon Bedrock while simplifying operations through integrated cross-cloud management and multi-availability zone resilience. The outcome delivers faster migration, deeper intelligence, and strong returns on existing AWS and Oracle investments.

Turning You Data into a Competitive Advantage with AI

2:40 PM-3:25 PM

Artificial intelligence (AI) is reshaping how enterprises operate, compete, and innovate — but realizing its full potential requires a strong, well-architected foundation. This session explores how AWS and Oracle together provide the infrastructure, data platform, and tooling needed to build scalable AI capabilities that are secure, governed, and production ready. Attendees will leave with a clear framework for establishing an AI foundation that accelerates time-to-value and positions their organization for long-term intelligent transformation.

Networking Break

2:20 PM-2:40 PM

Lunch & Registration

12:00 PM-1:00 PM

Real-World Impact of Oracle Database@AWS

3:25 PM-4:10 PM

Join us for an intimate fireside chat with enterprise leaders who have transformed their businesses through Oracle Database@AWS (ODB@AWS). Potential panel members from Equifax, Zema, Nasdaq, Nationwide, and Ally Financial will share firsthand experiences on how implementing ODB@AWS has driven innovation, improved performance, and delivered measurable business outcomes. This interactive Q&A session offers a unique opportunity to hear directly from customers about their implementation journeys, lessons learned, and the competitive advantages gained through the AWS/Oracle partnership.

Boston Red Sox vs NYC Yankees
