Facing the Hype: An Executive Reality Check on Al in Supply Chain

1:15 PM-2:00 PM

Al is dominating boardroom conversations—but for supply chain leaders in the consumer industry, the question isn't if Al is coming, it's what's actually working. In this candid fireside chat, we'll cut through the hype to explore where Al is delivering measurable value, and where it's still just a slide in a sales deck. We'll discuss how leaders who've seen Al deployed across planning, forecasting, and execution, and learn how to separate innovation worth investing in from noise that wastes time and budget.
