

# AGENDA

## Impacts of AI in Security CISO Dinner

### SPEAKERS

**Sachin Mehta**  
SVP  
Marsh & McLennan  
Companies

**RADHA  
KUCHIBHOTLA**  
CTO  
Hawk Areospace

**Aslam Merchant**  
Former VP, Head of  
Enterprise  
Architecture, Chief  
Architect  
Kaiser Permanente

**Dominic Ferrari**  
Director 3rd Party  
Risk Mgmt.  
Alkermes Inc.

### IMPACTS OF AI IN SECURITY

**June 06, 2024**

6:00 PM-9:30 PM

Eastern Time

Artificial Intelligence is a pervasive part of our lives today and cybersecurity teams and adversaries alike have learned to harness the speed and power of machines to strengthen their capabilities. With machine learning becoming one of the most important tools of defense, leaders must balance the overwhelming speed and accuracy advantage of AI with the need for measured and intuitive interactions with a real-world human element. Join this session to discuss: What these trends mean for security teams What happens when the velocity of innovation outpaces the capabilities of human intellect The evolving role of automation in the effective practice of securing our digital world
