AGENDA

The 1st Cloud Runtime Security Summit
CADR:CON

SPEAKERS

Tom Croll
Advisor & Former Gartner Analyst
Lionfish Tech Advisors

Gokula Mishra
VP of Data Science
Direct Supply

Michael LaRue
Deputy Director of Software Delivery & Data
University of Illinois at Chicago

Vijay Jakka
Global Data Governance Leader
MetLife

Abhay Shah
Head of Technology, Infosec Risk & Compliance
DoorDash

Russ Felker
CTO
Trinity Logistics

Ebenezer Arumai
Director of IT Infrastructure & Security
Inogen Inc.

Steve Zalewski
Former CISO
Levi Strauss & Co.

Sabrykrishnan Loganathan
Director of Digital & Gen-AI Strategy
Regal Rexnord

Welcome & Registration

Opening Remarks

9:00 AM-9:15 AM

VISION VOICES

9:15 AM-9:40 AM

Bridging the Gap: From CNAPP to CADR – Securing Cloud-Native Applications End-to-End

In today's dynamic cloud landscape, organizations face an ever-expanding array of security challenges that span from development environments to full-scale cloud deployments. This session will explore the evolution of cloud security by examining how traditional Cloud-Native Application Protection Platforms (CNAPP) are being enhanced with advanced Cloud Application Detection and Response (CADR) capabilities. Attendees will gain insights into how these integrated frameworks provide comprehensive, end-to-end protection—bridging the gap between proactive risk management and real-time threat mitigation.

PANELISTS

Tom Croll
Advisor & Former Gartner Analyst
Lionfish Tech Advisors

9:45 AM-10:20 AM

A New Era in Cloud Runtime Security: Cloud Application Detection & Response

Detecting and responding to cloud attacks has never been more challenging. Modern attacks and the ever-changing nature of cloud infrastructure and applications make security teams' lives more difficult than ever. A new approach is needed - one that can provide a fully traceable & explainable runtime security story spanning the entire cloud technologies stack.

Networking Break

10:20 AM-10:40 AM

PANEL

10:40 AM-11:25 AM

The Modern CISO Strategy and Priorities: Protecting Cloud Infrastructures and Applications Against Modern Attacks

In recent years, we have added more and more tools to protect our cloud infrastructures and applications , but are we really more secure?
Traditionally, we started with the cloud security posture, but was that the right move?

The cloud security market has grown and changed significantly - from CSPM, to ASPM and CNAPP. It seems that every few months a new category is popping up. But what is still missing? Where should we focus next? posture or runtime? shift left or protect right?

CHAIR

PANELISTS

Steve Zalewski
Former CISO
Levi Strauss & Co.

Tom Croll
Advisor & Former
