

AGENDA

The 1st Cloud Runtime Security Summit

CADR:CON

SPEAKERS

Tom Croll
Advisor & Former
Gartner Analyst
Lionfish Tech
Advisors

Gokula Mishra
Board Member
Beautiful Mnds Youth

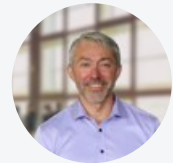

Michael LaRue
Deputy Director of
Software Delivery &
Data
University of Illinois
Chicago

Vijay Jakka
Global Data & AI
Practice Leader
Sankhya

Abhay Shah
Head of
Technology,
Infosec Risk &
Compliance
DoorDash

Russ Felker
CTO
TrinityLogistics

**Ebenezer
Arumai**
Director of IT
Infrastructure &
Security
Inogen Inc.

Steve Zalewski
Former CISO
Levi Strauss &
Company

**Sabrykrishnan
Loganathan**
Director of Digital &
Gen-AI Strategy
Regal Rexnord

Russ Felker
CTO
MegaCorp Logistics

**Sabry
Loganathan**
Senior Director AI
Engineering
Peloton Interactive

April 23, 2025

Central Time

Welcome & Registration

8:30 AM-9:00 AM

Opening Remarks

9:00 AM-9:15 AM

VISION VOICES

9:15 AM-9:40 AM

Bridging the Gap: From CNAPP to CADR – Securing Cloud-Native Applications End-to-End

In today's dynamic cloud landscape, organizations face an ever-expanding array of security challenges that span from development environments to full-scale cloud deployments. This session will explore the evolution of cloud security by examining how traditional Cloud-Native Application Protection Platforms (CNAPP) are being enhanced with advanced Cloud Application Detection and Response (CADR) capabilities. Attendees will gain insights into how these integrated frameworks provide comprehensive, end-to-end protection—bridging the gap between proactive risk management and real-time threat mitigation.

SPEAKER

Tom Croll

Advisor & Former
Gartner Analyst
Lionfish Tech
Advisors

KEYNOTE

9:45 AM-10:20 AM

A New Era in Cloud Runtime Security: Cloud Application Detection & Response

Detecting and responding to cloud attacks has never been more challenging. Modern attacks and the ever-changing nature of cloud infrastructure and applications make security teams' lives more difficult than ever.

A new approach is needed - one that can provide a fully traceable & explainable runtime security story spanning the entire cloud technologies stack.

Networking Break

10:20 AM-10:40 AM

PANEL

10:40 AM-11:25 AM

The Modern CISO Strategy and Priorities: Protecting Cloud Infrastructures and Applications Against Modern Attacks

In recent years, we have added more and more tools to protect our cloud infrastructures and applications , but are we really more secure?

Traditionally, we started with the cloud security posture, but was that the right move?

The cloud security market has grown and changed significantly - from CSPM, to ASPM and CNAPP. It seems that every few months a new category is popping up. But what is still missing? Where should we focus next? posture or runtime? shift left or protect right?

CHAIR

Steve Zalewski

Former CISO
Levi Strauss &
Company

PANELISTS

Tom Croll

Advisor & Former
Gartner Analyst
Lionfish Tech
Advisors

Abhay Shah

Head of
Technology,
Infosec Risk &
Compliance
DoorDash

**Sabrykrishnan
Loganathan**

Director of Digital &
Gen-AI Strategy
Regal Rexnord

Executive Roundtable Lunch

11:30 AM-12:30 PM

Closing Remarks

12:30 PM-1:00 PM

BROUGHT TO YOU BY

ARMO
