

# AGENDA

Brains Need a Backbone: Databases for the GenAI Era

## Executive Dinner

### SPEAKERS

**Muthukumar Devadoss**  
Director, Information Security  
TradeWeb Markets

**Trista Huang**  
SVP Technology & Analytics  
BRE Hotels & Resorts - Blackstone's

**Louis Celiberti**  
Managing Director  
Guggenheim Partners

**Sigal Gino**  
Director Cloud Engineering  
WPP Media

**Tom Yang**  
Director, Engineering  
NBCUniversal

**Viktoriya Smith**  
SVP  
Citi

**Ibrahim Jackson**  
Founder & CEO  
Ubiquitous Preferred Services

**Wim Verleyen**  
AVP Data Science, Research and Development  
Humana

**Nikit Assudani**  
VP, Multi-Cloud Product & Risk Delivery Manager  
JPMorgan Chase

**BRAINS NEED A BACKBONE: DATABASES FOR THE GENAI ERA**

**July 22, 2025**

5:30 PM-9:00 PM

Eastern Time

Databases are fundamental to AI applications, providing the critical infrastructure for managing the vast volumes of structured and

unstructured data that power intelligent systems. As organizations look to streamline the development and deployment of generative AI agents, new innovations are emerging to simplify and accelerate this process. These include tools for secure large language model (LLM) hosting, real-time vector processing, efficient unstructured data ingestion, and customizable agent frameworks. Enhanced data workflows and built-in operational safeguards allow developers to build scalable, responsive AI applications with greater confidence and control.

TOGETHER WITH
