

# AGENDA

Data sovereignty in the age of AI: Is it time to rethink your cloud strategy?

## Executive Dinner

### SPEAKERS

**Mihai Hendea**  
Head of IT  
[TK Elevator](#)

**Panagiotis (Panos) Toumpaniaris**  
Senior Cloud Architect  
[Atos](#)

**Vishal Shinde**  
Account Executive - Cluster Head  
[Atos](#)

**Paul Notte de Vaupleux**  
Head of Transformation Office  
[PartnerRe](#)

**Martina Fuchs**  
Advisor, Television Anchor, Business Correspondent  
[Martina Fuchs](#)

**Philipp Gergen**  
Associate Director Data Science  
[UBS](#)

**Philemon Handschin**  
Associate Director, Information Technology  
[Zimmer Biomet](#)

**Claus Hintermeier**  
Head Enterprise IT Architecture  
[Zürcher Kantonalbank](#)

**Mohan Gowda Purushothama**  
Principal GenAI Architect  
[AWS](#)

**Creedence Waetford**  
Head of IT  
[Roche](#)

**Philipp Knecht**  
Solutions Architecture Team Manager  
[AWS](#)

DATA SOVEREIGNTY IN THE AGE OF AI: IS IT TIME TO RETHINK YOUR CLOUD STRATEGY?

**June 24, 2025**

5:30 PM-9:30 PM

Central European Time

As concerns over privacy, foreign data access, and geopolitical tensions grow, data sovereignty laws are expanding rapidly across the globe. For C-level leaders, the challenge is no longer just about where data is stored - but also how to remain compliant without compromising the agility, scalability, and innovation of public cloud and AI adoption. Sovereign cloud solutions have emerged as a key strategy - shifting the focus from data location to who controls access, operations, and AI governance. As organizations integrate generative and agentic AI into their operations, ensuring that data used to train, operate, and enhance these systems complies with local regulations has become a strategic imperative. Yet, implementing sovereign cloud architectures comes with trade-offs in cost, complexity, and innovation flexibility. For sensitive workloads and AI-driven use cases, the strategic value is clear - but achieving the right balance between sovereignty, AI performance, and long-term business goals will define the next wave of digital leadership.
