AGENDA

CVISION INTERNATIONAL

Data sovereignty in the age of AI: Is it time to rethink your cloud strategy?

Executive Dinner

SPEAKERS

Mihai Hendea
Head of IT
TK Elevator

Panagiotis (Panos) Toumpaniaris
Senior Cloud Architect
Atos

Vishal Shinde
Account Executive - Cluster Head
Atos

Paul Notte de Vaupleux
Head of Transformation Office
PartnerRe

Martina Fuchs
Advisor, Television Anchor, Business Correspondent
Martina Fuchs

Philipp Gergen
Associate Director Data Science
UBS

Philemon Handschin
Assoc. Director, IT
Zimmer Biomet

Claus Hintermeier
Head Enterprise IT Architecture
Zürcher Kantonalbank

Mohan Gowda Purushothama
Principal GenAI Architect
AWS

Creedence Waetford
Head of IT
Roche

Philipp Knecht
Solutions Architecture Team Manager
AWS

DATA SOVEREIGNTY IN THE AGE OF AI: IS IT TIME TO RETHINK YOUR CLOUD STRATEGY?

June 24, 2025
5:30 PM-9:30 PM

Central European Time

www.cvisionintl.com

As concerns over privacy, foreign data access, and geopolitical tensions grow, data sovereignty laws are expanding rapidly across the globe. For C-level leaders, the challenge is no longer just about where data is stored - but also how to remain compliant without compromising the agility, scalability, and innovation of public cloud and AI adoption.

Sovereign cloud solutions have emerged as a key strategy - shifting the focus from data location to who controls access, operations, and AI governance. As organizations integrate generative and agentic AI into their operations, ensuring that data used to train, operate, and enhance these systems complies with local regulations has become a strategic imperative.

Yet, implementing sovereign cloud architectures comes with trade-offs in cost, complexity, and innovation flexibility. For sensitive workloads and AI-driven use cases, the strategic value is clear - but achieving the right balance between sovereignty, AI performance, and long-term business goals will define the next wave of digital leadership.
