Strategic Migration of AI Workloads to AWS: Building Scalable, Compliant, and Future-Ready Solutions
As AI adoption accelerates, organizations are re-evaluating their platforms to enhance scalability, performance, and governance. Join zeb and AWS to explore a strategic approach to migrating AI workloads to AWS-native services like Amazon Bedrock, SageMaker, and Amazon Q. Learn how zeb helps businesses map equivalent services, optimize architectures, and reduce complexity while ensuring compliance, security, and operational efficiency. Through real-world case studies and proven migration patterns, discover how enterprises can modernize their AI ecosystems and unlock long-term value with AWS's powerful AI and ML capabilities.
