BEYOND THE DASHBOARD: AGENTIC AI FOR BUSINESS LEADERS

November 12, 2026
6:00 PM-9:30 PM
Eastern Time

Margin pressure, shifting market dynamics, and rising customer expectations are challenging leaders across industries to rethink how their businesses operate. Join fellow C-suite executives for an engaging dinner and candid conversation on the rise of the agentic enterprise: AI that moves beyond reporting and insights to help plan, make decisions, and take action across critical business functions—all within the guardrails you define.

Over dinner, we'll exchange perspectives on where agentic AI is creating meaningful impact, how to balance autonomy with human oversight, and what it takes to turn emerging technology into a lasting competitive advantage. No slides, no sales pitch. Just great food and thoughtful conversation with executive peers to share experiences, challenge assumptions, and learn from one another. Seats are limited.
