DRIVING OPERATIONAL EXCELLENCE WITH AI AND EDGE INNOVATION

September 30, 2025
9:30 AM-1:00 PM

Central Time

This session is designed for leaders in energy, transportation, logistics, and industrial sectors. It will explore how Agentic AI and Edge Connectivity are moving beyond the pilot phase to deliver real enterprise value, boosting operational efficiency, enhancing safety, and enabling smarter decision-making in complex, distributed environments.

Through real-world use cases, you'll gain insight into how AI is streamlining workflows, detecting anomalies, and improving both customer and field service. We'll also discuss strategies for deploying AI at scale across remote and mobile operations, and how edge connectivity enables real-time data processing where it's needed most. Walk away with actionable ideas and peer insights to drive scalable, responsible AI adoption.
