**Bridging the Gap: Mastering the Art of Business- Technology Harmony** 

9:40 AM-10:25 AM

Bridging the gap between business and technology is not easy and requires discipline and balance between technology, people, and the business. For so many organizations today, technology is the business. Technology needs to be understood as a critical enabler in every part of the organization from the front line to the back office. It creates new value by crunching data to deliver new insights, it spurs innovation, and it disrupts traditional business models.

For business and technology leaders alike, new actions and behavioral changes can help their organizations make this shift. CIOs must take responsibility for problems, they should convey that when technology fails, many people typically share responsibility.

#### **VISION VOICES**

## Fostering Digital Trailblazers: A Strategic Imperative for CIOs in 2024

Addressing the multifaceted challenges faced by CIOs in the contemporary technological landscape, the imperative to develop transformational leaders takes center stage. The heightened demand for innovation, enterprise-wide transformation, and evolving technology capabilities poses significant hurdles for CIOs.. To navigate this complexity, the focus shifts towards fostering digital transformation leaders, referred to as digital trailblazers. We will explore strategies for nurturing innovation in the digital age, including the dynamic interplay of technology, leadership, and creativity. Learn how to empower teams to lead in a rapidly evolving landscape, gaining insights that could redefine your approach to digital leadership.

## **Unleashing Innovation: CIOs Driving New Business** Models through Scalable GenAl

In this dynamic session, we explore the symbiotic relationship between business evolution and the strategic role of Chief Information Officers. Focused on scaling generative artificial intelligence (GenAI) for new business models, the discussion delves into how CIOs can harness the transformative power of AI to drive innovation and reshape business paradigms. Participants will gain insights into practical

## Power of GenAl: Unlocking Innovation in the Cloud

11:35 AM-12:20 PM

This session will explore the convergence of cloud computing and generative artificial intelligence (GenAI) technologies, offering technology executives insights into the transformative potential of this synergistic relationship. From accelerating innovation and enhancing productivity to enabling personalized experiences and driving competitive advantage, GenAI-powered solutions in the cloud are reshaping industries and revolutionizing business operations. Join us as we discuss practical strategies and use cases for harnessing the power of GenAI in the cloud, including machine learning, natural language processing, and computer vision applications. Whether you're leading a technology organization or driving digital transformation initiatives, this session provides valuable perspectives on leveraging GenAI to unlock innovation and drive business success in the cloud-centric era.

## Strategic Shifts: Reimagining Engineering Talent Deployment and Management in the Age of GenAl

Unlock insights into the evolving landscape of talent deployment and retention as board expectations drive CIOs to rethink traditional IT talent models. Explore the impact of GenAI on coding processes and the software engineering lifecycle, and discover strategies for optimizing talent allocation and headcounts. Gain actionable insights into defining new roles, cultivating essential skills, and charting GenAI-centric career paths to align with organizational goals and stay ahead in a rapidly changing technological landscape.

## Test Data Unleashed: Shifting Left Your Data for Strategic Success in the Digital Landscape

In a world where software development races towards unprecedented automation and efficiency, the spotlight turns to an oftenoverlooked hero: Test Data Management (TDM). The recent acquisition of Delphix by Perforce not only marks a significant milestone in
enterprise data management but also heralds the dawn of a new era for TDM. This evolution is driven by the critical need for real, live
production data in testing environments, pushing TDM into the limelight as the cornerstone of accelerating software development and
deployment cycles. You're invited to explore the transformative impact of TDM on the software development landscape, emphasizing its
pivotal role in crafting robust, reliable, and market-ready software solutions. Dive into an exploration of how TDM platforms are bridging
the gap between theoretical testing and real-world chaos, are not only shaping the future of software testing but are redefining the
essence of quality assurance in the digital age.

## Radical Simplicity: Addressing Everything.

2:20 PM-2:35 PM

2:00 PM-2:15 PM

IT complexity is slowing everything down, increasing our threat surfaces and costs. We all keep trying to solve security at the infrastructure layers by throwing more and more products and people at the problem. But that just adds to the complexity and makes things worse further hindering the velocity and adaptability of our businesses. It's time to rethink the strategy. In this session, we'll discuss the seemingly impossible. Removing attack surfaces, using business rules not technical ones, reducing operating costs, and allowing your business to accelerate. No blockchain, no AI, no massive IT transformation, but a controlled migration to a new design pattern, using your existing infrastructure and applications.

The next big thing? Our customers say yes! But tell us what you think.

## The Future of Digital Strategy in a Rapidly Evolving Landscape

In the swiftly evolving digital landscape, the future of digital strategy promises dynamism and transformation. As technology progresses at an unprecedented pace, organizations are compelled to recalibrate their digital strategies to remain competitive and relevant. Emphasizing data-driven decision-making, integration of Al and machine learning, and prioritizing a seamless user experience stand at the forefront of this adaptation. Moreover, as sustainability and ethical considerations gain prominence, responsible practices must be woven into digital strategies. Succeeding in this dynamic environment hinges on adopting a proactive and flexible approach to digital strategy, enabling organizations not only to keep pace with change but also to lead in shaping the digital future.
