TURNING GENAI INTO BUSINESS IMPACT

April 21, 2026

5:30 PM-9:00 PM

Central Time

Join us for an exclusive executive dinner on April 21st in Dallas. This private gathering is designed for CXO-level leaders to expand their network and connect with peers shaping the future of cloud and AI. Together, we'll explore the real business opportunities and challenges of Generative AI on AWS, and how organizations are moving beyond experimentation to drive measurable outcomes, from productivity gains and intelligent automation to secure, scalable adoption. This evening is an opportunity to build new relationships, exchange peer insights, and engage in a thoughtful discussion on what it takes to create an AI-ready enterprise.

TOGETHER WITH
