**WHY YOUR AI PROGRAM IS STUCK: THE  
EXECUTIVE CONVERSATION ABOUT DATA  
TRUST**

**March 31, 2026**

5:30 PM-9:00 PM

Eastern Time

If your teams are “doing AI” but still arguing about basic KPIs, you’re not alone—and it’s not a model problem. It’s a data trust problem. Join a small group of CXOs for an open conversation about the hidden blockers: reconciliation loops, manual reporting drag, inconsistent definitions, access control headaches, and compliance constraints. We’ll share what leaders are doing to establish governed, usable insights on AWS so reporting is reliable, decisions come faster, and AI efforts have a clean, permissioned foundation.

### PARTNERS
