AGENDA

The 1st Cloud Runtime Security Summit
CADR:CON

SPEAKERS

Shauli Rozen
CEO and Co-Founder
ARMO

James Berthoty
Founder
Latio Tech

Kshitish Soman
Head of Security for GenAI, Cloud, Emerging Tech
Seagate

Shadaab Kanwal
MD - Digital, Data, and Analytics
Charles Schwab

Marc Mackey
Global IT Director
Nike

Anand Thangaraju
CISO
ePlus

Dennis Barnes
VP IT Infrastructure & Security
SF Fire Credit Union

Herman Brown
CIO
SF District Attorney's Office

Jonathan Chan
Head of Global IT & Security (CISO)
Episource

Mimoh Das
VP of IT & Systems
San Francisco SPCA

Melina Taylor
Director of IT
Hopelab

Gilles de Bordeaux
CIO, VP of Engineering & Co-Founder
Smart Bumper Sticker

Samhitha Upadhya
VP Product Manager
Bank of America

Steve Zalewski
Former CISO
Levi Strauss & Co.

Aladdin Elston
Executive Director, Senior Lead Cybersecurity Strategist
Wells Fargo

Todd Dekkinga
VCISO & COO
Cyber Way US

VISION VOICES

The Future of Cloud Security Must be Runtime

In this session, James will argue that while companies are tempted to start with visibility and posture management, they would be better served to start their security journey with meaningful runtime protection. James will give a brief overview of what runtime solutions exist in the market, and what combination of features are most important to building a robust real security program. If you're tired of chasing down false positives and debatable findings, you won't want to miss it!

CHAIR   **PANELISTS**

James Berthoty
Founder
Latio Tech

KEYNOTE

## A New Era in Cloud Runtime Security: Cloud Application Detection & Response

Detecting and responding to cloud attacks has never been more challenging. Modern attacks and the ever-changing nature of cloud infrastructure and applications make security teams' lives more difficult than ever. A new approach is needed - one that can provide a fully traceable & explainable runtime security story

spanning the entire cloud technologies stack.

PANEL

10:40 AM-11:25 AM

The Modern CISO Strategy and Priorities: Protecting Cloud Infrastructures and Applications Against Modern Attacks

In recent years, we have added more and more tools to protect our cloud infrastructures and applications, but are we really more secure?
Traditionally, we started with the cloud security posture, but was that the right move?
The cloud security market has grown and changed significantly - from CSPM, to ASPM and CNAPP. It seems that every few months a new category is popping up. But what is still missing? Where should we focus next? posture or runtime? shift left or protect right?
CHAIR   PANELISTS

Steve Zalewski
Former CISO
