**VIEWING CYBERSECURITY WITH A NEW
LENS: FROM CUTTING EDGE PREVENTION
TO NEXT LEVEL PLANNING**

July 08, 2021

1:45 PM-3:00 PM

Eastern Standard Time (EST)

Cyber criminals not only remain a step ahead... they are widening the gap. Today's global enterprise has to contend with a persistent adversary and an exponentially growing and complex risk landscape. Building a resilient cybersecurity strategy includes

more focus than ever before. You have to put yourself in the shoes of the bad actors to truly see your vulnerabilities in a new way. Do you have the right prevention tools? How are you efficiently and effectively planning for a response? Does your full team know your incident response protocol? Are you ready when matters most?

Join a panel of your peers to discuss these and much more.

Key takeaways:

- Understanding the adversaries view
- Proper implementation of prevention tools
- How to plan for response to potentially impactful incidents
