CYBER RESILIENCE AND READINESS: RAPID RESPONSE AND RESILIENT DEFENSE

March 18, 2024

5:30 PM-9:00 PM

Central European Time

In the dynamic landscape of cybersecurity, CISOs and CIOs shoulder the vital responsibility of not only cultivating cyber resilience but also orchestrating rapid responses to thwart attacks across their organization. This dinner session will offer an open discussion for all attendees on the pivotal role of a robust prevention and incident response strategy in accomplishing these dual objectives. During the session, we will delve into the imperative for CISOs and CIOs to seamlessly integrate proactive measures into their cybersecurity framework, thereby bolstering the organization's resilience against potential threats. Amid the ever-evolving realm of sophisticated attacks, this discourse will provide attendees with the ability to consider the proactive and reactive facets of Cyber Security. This ensures not only detection and containment but also the prevention of cyber threats within their networks.
