ENABLING A NEW ERA OF PATIENT CARE BY SECURING CONNECTED MEDICAL DEVICES

March 20, 2024
3:00 PM-4:15 PM

Eastern Time

Healthcare providers around the world are reimagining the patient experience with the use of smart medical devices. While these

devices are providing breakthrough improvements in patient outcomes, your role as the security hero/heroine requires protecting those efforts from new threat vectors and vulnerable assets from attacks and exploits. Join this session to share and hear latest industry research, and discuss how to ensure your smartest devices can also be your safest devices.
