

# AGENDA

## Illuminating Identity Risk Blindspots: Eliminating the Top Vectors for Attacks CISO Dinner

### SPEAKERS

Ofer Israeli  
CEO & Founder  
Illusive Networks

Ken Kazinski  
Global Application  
Security Sr Manager  
Abbott

Cole Sinkford  
CISO  
GE Energy

Kevin McDermott  
CTO  
Cook County

Igor Volovich  
Vice President,  
Strategy  
Qmulos

Cole Sinkford  
CISO

### ILLUMINATING IDENTITY RISK BLINDSPOTS: ELIMINATING THE TOP VECTORS FOR ATTACKS

**October 06, 2022**

5:30 PM-9:00 PM

Central Time

Identity is now the number one attack vector – vulnerable identities are present in every organization. Identity risks are like a residue that remains after the course of normal IT operations. Vulnerable identities persist because of gaps between IT and security teams, and because of gaps within existing identity solutions, such as Privileged Access Management (PAM). Unmanaged and misconfigured identities, such as service accounts and Shadow Admins, make it trivial for attackers to find and then exploit exposed identities. Identity Risk Management proactively identifies and removes these vulnerable credentials and connections, preventing attackers from gaining privileged access. Research from Illusive shows: -1 in 6 enterprise endpoints has exploitable identity risks - 87% of local admins are not enrolled in a privileged account management (PAM) solution -Every organization lacks visibility into vulnerable “shadow admins” -More than 1 in 10 endpoints has cached credentials from privileged accounts—the digital equivalent of leaving your password on a sticky note

## CHAIR

**Igor Volovich**  
Vice President,  
Strategy  
Qmulos

## PANELISTS

**Cole Sinkford**  
CISO  
GE Energy

**Kevin McDermott**  
CTO  
Cook County

**Ofer Israeli**  
CEO & Founder  
Illusive Networks

**Ken Kazinski**  
Global Application  
Security Sr Manager  
Abbott

**Cole Sinkford**  
CISO  
GlobalFoundries
