**June 02, 2026**

Eastern Time

# Balancing Act: Speed, Security, and Governance in the Era of Agentic AI

5:30 PM-8:15 PM

We agree with you. Scaling GenAI across an organization offers immense rewards, but it also introduces an entirely new frontier of data visibility and exfiltration risks. Senior executives are caught in a delicate balancing act - striving to accelerate AI-driven productivity while rigidly protecting sensitive data and maintaining strict compliance.

We invite you to pull up a chair with fellow technology and security leaders for a private discussion on mastering this equilibrium. Together, we will examine real-world approaches to securing AI platforms, governing autonomous workflows, and leveraging enterprise cloud architectures like AWS to build a resilient, compliant infrastructure for the future.

Bring your toughest governance questions to the table, unwind with your peers, and leave with a foolproof AI roadmap after a fantastic culinary experience.

## Bourbon Tasting

8:15 PM-9:00 PM

Great bourbon, much like great AI, is defined by the quality of its distillation. To conclude our evening, join us for a guided tasting of premium American spirits. Just as Zscaler and AWS Bedrock help you distill data into secure, actionable insights, we will explore the unique profiles and craftsmanship behind elite distilleries. It is the perfect atmosphere to "filter" out the noise of the day and continue the conversation with your peers.
