**MORE POWER, LESS COST: HOW  
COMPACTIFAI API REDEFINES EFFICIENCY IN  
AI**

**February 04, 2026**

5:30 PM-9:00 PM

Pacific Time

As AI scales, efficiency and affordability are everything. CompactifAI is a breakthrough technology that compresses AI models without sacrificing accuracy making AI faster, cheaper, and easier to deploy at scale. In this session, you will see real-world examples of how CompactifAI API integrates seamlessly into existing pipelines to slash compute costs, boost speed, and accelerate time-to-market. If performance, scalability, and cost matter to your AI projects, this session is for you.
