OPERATIONALIZING AI: TURNING INNOVATION INTO MEASURABLE BUSINESS OUTCOMES

April 23, 2026

5:30 PM-9:00 PM

Eastern Time

Join us for an executive roundtable designed exclusively for IT leaders across Private Equity and portfolio companies. This discussion will focus on moving beyond AI proof-of-concepts and into scalable, production-ready deployments that drive measurable business value.

Together with Ollion and Justin Leto, AWS's Global Principal Architect for Private Equity, we'll explore advanced strategies for leveraging AI to enhance decision-making, streamline operations, and accelerate tangible ROI across portfolio environments. This session offers the opportunity to gain practical insights, exchange perspectives with industry peers, and walk away with actionable approaches to operationalizing AI at scale.
