### BEYOND THE POC: SCALING AI WITH SMARTER DATA GOVERNANCE

**July 22, 2025**

5:30 PM-9:00 PM

Central Time

AI initiatives stall for the same reasons: unclear ownership, patchy data, and too many proof-of-concepts that never prove anything. At this private dinner, we'll bring together finance and operations leaders navigating the same roadblocks—and share what it takes to break through. We'll dig into how smarter data governance enables real AI impact, what's needed to move from experimentation to execution, and how to align on the use cases that actually matter. Whether you're looking for your first win or ready to scale, this conversation is built to deliver traction, not just talk.
