DRIVING ROI IN CLOUD SECURITY: AI-POWERED RISK MITIGATION & SOC EFFICIENCY

October 02, 2025

6:00 PM-9:00 PM

United Kingdom Time

Join fellow CISOs for an exclusive roundtable dinner focused on unlocking measurable value from cloud security investments. This intimate forum brings together senior security leaders to explore how AI-driven strategies are reshaping cybersecurity—helping organizations streamline operations, improve outcomes, and consolidate their approach to securing complex environments. As cloud infrastructures grow in scale and diversity, security leaders are under pressure to accelerate detection and response while controlling costs and simplifying their toolsets. This conversation will dive into how AI and automation are transforming the SOC—from reducing time-to-respond and automating triage to unifying visibility across hybrid, multi-cloud, and SaaS environments. Hear how forward-thinking teams are achieving faster ROI, reducing analyst fatigue, and aligning cloud security initiatives with core business goals.
