5:30 PM-9:00 PM

Eastern Time

According to Gartner, 79% of companies have experienced at least one cloud data breach during the pandemic. But the migration of critical business data to the cloud shows no sign of slowing. In fact, it's accelerating. Yet, despite powerful trends and mounting threats, traditional data security has simply not kept pace with the cloud. Security teams still struggle to even understand the reality of what sensitive data they have in the cloud and its associated risks. This is not a sustainable status quo. Data is increasingly a business most valuable asset. And until organizations can align around a shared Data Reality, cloud security will remain several steps behind intensifying security threats and tightening data regulations.

CHAIR

Larry Whiteside
CISO
Core Five Security

PANELISTS

Tim Swope
CISO
Catholic Health
System

Janos Hajagos
Chief of Data
Analytics
Stony Brook
Medicine

Anthony Rajkumar
COO
Prime Healthcare St
Clare's Dover

Yotam Segev
Co-Founder & CEO
Cyera US Inc.
