## CLOUD DATA SECURITY

**December 14, 2022**

5:30 PM-9:00 PM

Eastern Time

According to Gartner, 79% of companies have experienced at least one cloud data breach during the pandemic. But the migration of critical business data to the cloud shows no sign of slowing. In fact, it's accelerating. Yet, despite powerful trends and mounting threats, traditional data security has simply not kept pace with the cloud. Security teams still struggle to even understand the reality of what sensitive data they have in the cloud and its associated risks. This is not a sustainable status quo. Data is increasingly a business most valuable asset. And until organizations can align around a shared Data Reality, cloud security will remain several steps behind intensifying security threats and tightening data regulations.

## PANELISTS

**Tim Swope**  
CISO  
Catholic Health  
System

**Janos Hajagos**  
Chief of Data  
Analytics  
Stony Brook Medicine

**Anthony  
Rajkumar**  
COO  
Prime Healthcare St  
Clare's Dover

**Yotam Segev**  
Co-Founder & CEO  
Cyera US Inc.
