

# AGENDA

Seeing the Full Picture: Securing the AI-Native, Cloud-First Enterprise

## Executive Dinner

### SPEAKERS

**Lars Silberg Hansen**  
Head of AI &  
Automation  
NTG

**Rasmus Kær  
Jørgensen**  
Head of AI Research  
DSV

**Cyril Dhenaut**  
Founder  
Inbetween-sparring

**Charles Widdis**  
Head, Manufacturing  
Security CoE  
Novo Nordisk

**Charlotte Miolane**  
CISO  
COWI

### SEEING THE FULL PICTURE: SECURING THE AI-NATIVE, CLOUD-FIRST ENTERPRISE

**May 21, 2026**

6:00 PM-9:30 PM

Central European Time

A recent security research finding involving Moltbook, an experimental social platform built for AI agents, highlights a growing challenge for today's technology leaders. The platform quickly gained attention for its futuristic concept. AI agents interacting, posting, and collaborating in their own digital community. But researchers soon discovered a critical backend misconfiguration that exposed sensitive data and system access, revealing how rapidly built "AI-native" applications can unintentionally create serious security blind spots. The incident underscores a broader trend: as AI dramatically lowers the barrier to building and deploying software, innovation is accelerating faster than many security practices and governance models can keep up.

This executive dinner will explore what this shift means for IT and security leaders as organizations scale cloud adoption and AI-driven development. How can companies move quickly to capture the productivity and ROI benefits of AI while minimizing exposure to misconfigurations, identity risks, and unseen vulnerabilities across hybrid and multi-cloud environments? The conversation will focus on practical strategies for embedding secure-by-design

principles, improving visibility, and strengthening governance so organizations can innovate confidently, ensuring speed, trust, and resilience evolve together rather than in conflict.
