FROM QUICK WINS TO HYPERAUTOMATION: MAKING AI WORK FOR YOUR BUSINESS

July 17, 2025

5:30 PM-9:00 PM

Pacific Time

The next wave of AI isn't about hype—it's about handling real work, faster. Join fellow business leaders for a conversation on how agentic and generative AI are driving measurable process improvements in finance and operations today. We'll unpack how to start small, assess readiness, and move toward high-value hyperautomation with confidence. Whether you're still getting your data in shape or exploring what's possible at scale, this dinner is built to spark ideas and offer a clear next step.

You'll walk away with:

- A clear view into how AI can drive value in finance and operations
- Guidance on identifying fast, focused use cases—and what it takes to scale them
- Access to a two-step offer: a 60-minute data quality assessment and, for qualified orgs, a hands-on AI Lab to prototype a working solution in just two days
