### BOLD INNOVATIONS CAN ONLY SUCCEED WITH MODERNIZED IT

**February 12, 2026**

6:00 PM-9:30 PM

Central European Time

True innovation begins with the right foundation. This executive engagement brings technology decision-makers together to discuss how migration and modernization in the AWS Cloud creates new opportunities for growth and experimentation. Modern IT architectures enable data-driven decisions, automated processes, and the secure integration of GenAI—thus becoming the engine of real value creation.

Together with the cloud experts from superluminar and AWS, we will take a closer look into:

- How to modernize cloud infrastructure to support fast, secure and compliant adoption of Generative AI
- Proven strategies for migrating critical workloads to AWS, that are helping business owners embrace change
- Best practices for costs optimization in the long term

Gain inspiration from real-world transformation initiatives where organizations have leveraged cloud migration and modernization to build a foundation for sustained innovation, greater efficiency, and long-term competitiveness.

TOGETHER WITH
