# BOLD INNOVATIONS CAN ONLY SUCCEED WITH MODERNIZED IT

**February 12, 2026**

6:00 PM-9:30 PM

Central European Time

True innovation begins with the right foundation. This executive engagement brings technology decision-makers together to discuss how migration and modernization in the AWS Cloud creates new opportunities for growth and experimentation. Modern IT architectures enable data-driven decisions, automated processes, and the secure integration of GenAI— thus becoming the engine of real value creation.

Together with the cloud experts from superluminar and AWS, we will take a closer look into:

How to modernize cloud infrastructure to support fast, secure and compliant adoption of Generative AI

Proven strategies for migrating critical workloads to AWS, that are helping business owners embrace change

Best practices for costs optimization in the long term

Gain inspiration from real-world transformation initiatives where organizations have leveraged cloud migration and modernization to build a foundation for sustained innovation, greater efficiency, and long-term competitiveness.

TOGETHER WITH
