BEYOND DORA—OPERATIONAL RESILIENCE FOR THE NEXT FINANCIAL ERA

October 15, 2025
6:00 PM-9:30 PM
United Kingdom Time

With the DORA compliance deadline now behind us, financial institutions are entering a new phase where operational resilience is no longer just about meeting regulatory requirements—it's a strategic differentiator. The past year's wave of enforcement, heightened scrutiny, and headline-making disruptions have tested the industry's preparedness and exposed new challenges.

This exclusive executive dinner will bring together financial services leaders to share lessons learned, explore best practices, and shape forward-looking strategies. Attendees will discuss real-world implications of DORA enforcement, the ongoing path to compliance, and how to translate resilience investments into tangible business value. The conversation will also highlight how AI and automation are helping organizations anticipate risks, adapt quickly, and strengthen operational agility in an era of constant disruption.
