THE GREATEST FEARS?

September 27, 2022

1:00 PM-2:15 PM

Central European Time

The biggest fear for CISOs is often human error, typified by a distracted user that falls for a well-crafted social engineering email. Secure email gateways and Microsoft fail to catch business email compromises and security analysts struggle to keep up with the flood of user-reported suspicious emails. How can we truly create a culture of security while also making the best use of a cybersecurity leader's most precious resource – people?
