**AGENTIC AI FOR INSURANCE & LENDING:
SYSTEMS THAT DECIDE, NOT JUST ASSIST**

August 20, 2026

6:00 PM-9:30 PM

India Standard Time

Every insurer and lender is running AI pilots. Almost none are running AI that makes a decision and owns it. This closed-door roundtable brings CXOs from insurance and lending together to talk about what production-grade agentic AI actually requires: underwriting agents, claims agents, credit decisioning that runs without a human in the loop, and the governance layer that has to exist before any of it goes live. No vendor pitches. Operators talking to operators about what's working, what's stuck in pilot purgatory, and what breaks first at scale.
