Successfully evaluating and implementing GenAI applications across the organization is critical to achieving a

competitive advantage. At the same time, IT teams face new challenges as they seek to provide users with secure access to GenAI apps, while preventing the exfiltration of sensitive data. And new agentic workflows further amplify the potential risks and rewards.

Join senior executives for a curated, invitation-only session to delve into real-world solutions that work together to secure your enterprise data and accelerate AI adoption on the AWS platform. Whether you are evaluating AI security solutions or defining your governance roadmap, this exclusive engagement will equip you with the insights to innovate securely, maintain compliance, and protect your enterprise data from costly risks.
